Automation 2014: Thanks for your visit to our stall.

ITEC S.r.l. (Industria **T**ecnologica) takes pleasure to thank you all for your visit, and to our stall at Automation 2014, conducted between 15th Oct to 18th Oct, at Bombay Exhibition Centre, Goregaon, Mumbai. The show has been the first step to our direct marketing in to Indian sub-continent and curtain raiser to our 25th year in the industry and we are overwhelmed by the foot fall at our stall and the customer turn-around we received at Automation 2014. We also take chance to thank our overseas visitors, especially from Middle-East and Asia-Oceania regions. And we also thank, Automation 2014 team, for providing us the chance to participate with the industry majors in our category in India.

ITEC brand name and product awareness was put forwarded through the exhibition in the industry, to reach the targeted customers and others, for which we are extremely thankful to all

visitors from PSUs who given us guidance for further development of our market through vendor registrations, Private sector companies – who given us chance to introduce ourselves as an alternate option to their existing suppliers, Engineering teams from EPCs & Contractors and all enthusiast GETs at various esteemed organizations.

ITEC wish to continue the success of the promotion through

follow up actions and possible visits to all the visitors at our stall. We appreciate your support and give us opportunity to conduct product introduction and awareness seminars at your organizations to showcase our potential to your co-workers, for which our Marketing team will contact you soon.

Thanks to all of you once again! And, as always, we are **ITEC...measuring with you.**

Our History

ITEC Srl. (Industria Tecnologica) as the name means was started in order to serve the Industry by manufacturing and selling the mechanical pressure and temperature gauges. The company was founded by Mr. Enzo Del-Conte in

Our Founder : Enzo Del-Conte

1989 who having almost more than 45 years experience in this field and a 100% family owned company since inception till date. In the beginning, the manufacturing of differential pressure gauges and diaphragm seals started. These products find a greater demand and market in Oil & Gas, Chemical and Petrochemical industries as they were flourishing and expanding the operations worldwide. The stainless steel gauge, gas filled thermometers & bi-metal thermometers were added in to manufacturing in 1990s' to enable to serve the market in a wider manner.

In 2011, ITEC expanded its operation in to India with JV forming with the Bhimani family to set-up ITEC Measures Pvt. Ltd. This enabled ITEC to expand its product portfolio with RTDs / Thermocouples / Thermowells, Pressure / Temperature switches and Level Switches / Instruments. The manufacturing plant is located in Vapi, Gujarat almost 150 km from heart of Mumbai. The factory set-up has a total built-up area of 25,000sqm. with most modern CNCs and testing facilities for the machining and testing of the instrument it manufacture.

“Started in 1989 at via Battisti in Invorio about 50 miles away from Milan, Italy”

Our Quality

Quality was always the key concern for ITEC and got certified for ISO 9001 in 1998. The ATEX certification as part of the product innovation and meeting the EU regulations for specific industries has done in the 2000s'. Technical expertise is always a plus point for ITEC, with Mr Del-Conte personally heading the Product Innovation Department. With sales increasing, the need to have the vendor registration with major oil & gas, Chemical & Petrochemical become a necessity, hence ITEC started the process of vendor listing with various worldwide oil & gas firms in 2000s' and listed as well and going on as a continuous. As part of the continuous improvement derivatives, the

management of ITEC has decided in perusing the ISO 14001 & OHSAS 18001 certifications to have the Integrated Management Systems in place to comply with norms of its customers.

Customization is one of the principle ITEC believes in. This drive us to develop many innovative design during our 25 years of span in the industry. Some of them are the External Zero Adjustment facility in pressure, differential pressure instruments, which helps our customer the easy correction of reading in dampened gauges, differential pressure measurement up to 40 bar with single side static up to 400 bar, etc. ITEC also customize various kind of diaphragm seals to meet its customer requirements.

In 1990s' ITEC started offering the OEM services to some of the major industries across Europe, which ITEC still offer to its Customers and started offering from our India factory from mid of 2014. These services include tailor-made product solutions and private labeling of the standard product it manufacture. ITEC engineering teams (Italy & India) work hand-in-hand to meet the customization of the product and come out with most economic and technically compatible solution for the OEM industries, such as the bayonet type thermocouple or for the bearing temperature RTDs for the power generators or the gold plated diaphragm seals for the Petroleum industry.
